

# NDIIPP Briefing

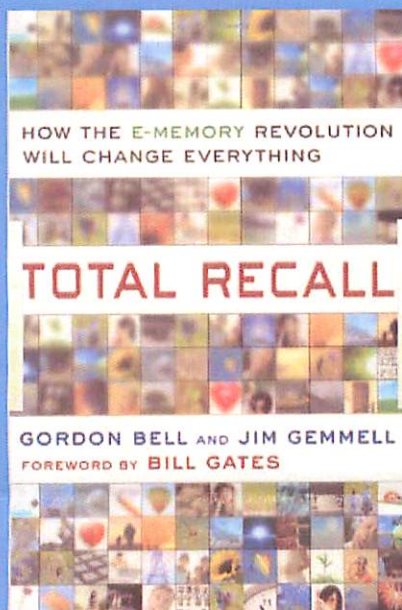

## MyLifeBits: Microsoft's Gordon Bell

Date: Wednesday May 5, 2010

Time: 12:00 noon

Place: National Digital Library Learning Center, Madison Building Atrium

The advent of personal computing devices such as PCs and smart phones with terabyte storage has enable the capture, recording and recall of everything a person reads, writes and hears. These are the new records and artifacts of the 21st century digital person.

Since 1998 Gordon Bell of Microsoft Research has worked on MyLifeBits, a system to digitally store everything in a person's life. Bell's talk will touch on the project's history and discuss the research challenges and the wide-ranging social and personal benefits of the MyLifeBits technology, especially as it pertains to cultural memory institutions.

An informal discussion coordinated by the OSI Program Management Office for Library staff to learn about the National Digital Information Infrastructure and Preservation Program (NDIIPP) and associated projects.

Contact Butch Lazorchak at [wlaz@loc.gov](mailto:wlaz@loc.gov) for more information.

Further details about NDIIPP are available at [www.digitalpreservation.gov](http://www.digitalpreservation.gov).
